Document no:	SMAC 194/Standardisation REV/Apr2013	Original: English
Title:	PROPOSED WMA COUNCIL RESOLUTION ON PATIENT SAFETY AND STANDARDISATION IN MEDICAL PRACTICE	
Destination:	194th Council Session The Laguna Resort & Spa, Nusa Dua Bali, Indonesia 4-6 April 2013	Action(s) required: For Consideration
Note:	This is proposed by Conseil National de l'Ordre des Médecins (CNOM) France, Consejo General de Colegios Médicos de España, and German Medical Association.	

Ensuring patient safety and quality of care is at the core of medical practice. For patients, a high level of performance can be a matter of life or death. Therefore, guidance and standardisation in healthcare must be based on solid medical evidence and has to take ethical considerations into account.

Currently, trends in the European Union can be observed to introduce standards in clinical, medical care developed by non-medical standardisation bodies, which neither have the necessary professional ethical and technical competencies nor a public mandate.

The WMA has major concerns about such tendencies which are likely to reduce the quality of care offered, and calls upon governments and other institutions not to leave standardisation of medical care up to non-medical self selected bodies.
